

Q.4 B]

- i) → The above map indicates Brazil Standard Time.
- ii) → Eastern part of ~~South~~ Brazil is ahead of others.
- v) → Ponto-De-Seixas lie to the eastern most direction.

Q.5

1) The northern part of Brazil is covered by dense forests.

→ a) Amazon River basin lies in the northern part of Brazil. In this region the annual average temperature is 28°C & the annual average rainfall is 2000 mm.

b) However, this climate, heavy rainfall, dense forests, etc. acts as a barrier to the development of human settlement. Hence, the interior in the Amazon Basin is very sparsely populated.
